

**Training for Professionals in Planning Roles**  
*Latest Developments in Statutory Constraints*

**LOCATION: THE MARKS TEY HOTEL, COLCHESTER**

This seminar is designed to bring planning and allied professionals up to date with:

- The New 2012 Tree Preservation Order legislation.
- The New 2012 BS Standard for Trees in Relation to Construction.
- The New 2012 arrangements relating to protected species.

Duration: 4 hours

There has been a range of inter-related movement on statutory and non-statutory guidance as it relates to the green environment over the last few months:

- New and fundamental changes in Tree Preservation Orders, with major impacts on how TPOs should be managed.
- A new British Standard for Trees that extends the scope of controls and procedures as it relates to design, demolition and construction.
- A new approach relating to protected species, Natural England's powers and the role and responsibility of the planning authority.

This training is run by qualified and experienced consultant arborists and specialists in ecology and environmental management, we shall be looking at the implications of environmental constraints to development.

**Who should attend?**

The course is beneficial to: *architects, land surveyors, land directors, developers, landscape architects, land and estate managers, engineers*
