## GUARANTEED ANALYSIS

Can be used in early spring to kick start grass and all through the spring and summer growing season. For application to all higher cut turf such as lawns, parks, outfields and golf course fairways. A higher proportion of urea in the blend means nutrients are available to the plant quickly even at lower temperatures; encouraging good growth early in the season. An economical fertilizer with low application rates. The MESA® granules, blue in colour, make it easier to see when spreading.
