Directions for use

- To optimize foliar uptake avoid high temperatures and sunny conditions.
- Ca-Booster should not be tank-mixed with other products.
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimize spray drift.
- The water volume used to apply Greenmaster Liquids will affect how nutrients are taken up by the plant.
- At low water volumes (400L/ha) the majority of nutrients are taken up by the foliage.
- At high water volumes (1000L/ha) the majority of nutrients are taken up by the roots.

Storage

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0°C and 40°C.
