TARGETED NUTRITION FOR TURF

BULLET

TARGETED NUTRITION FOR TURF

PHOSPHITE

Contains: 37%PO₃ +20.3%K₂O

Treats: 20,000 – 10,000 m²

Phosphite is a readily available liquid solution of potassium phosphate to assist the plant in periods of stress and aid in disease resistance. Phosphite is taken up quickly and mobilised around the whole plant providing protection for new and existing growth.

Super-concentrated form of stabilised phosphite (PO₃), a potent stimulator of plant root growth. Designed to strengthen turf grass by increasing resilience, particularly during periods of high stress and pathogenic pressure.

Application:

Apply at a rate of 5 – 10 litres per hectare in 200 – 300 litres of water. Apply evenly, avoid overlapping or missing areas, using a suitable calibrated sprayer. If there is no rain within 2 days of application irrigate the treated area thoroughly. Do not apply in hot, dry weather or frosty conditions.

Half fill the sprayer with clean water. Add concentrate as required and mix thoroughly whilst adding remaining water.

Applicator	Application Rate	Water Volume	Pack Size	Pack Coverage
Boom Sprayer	5 – 10 L/ha	200 – 300 L/ha	5 L	10,000 – 5,000 m ²
Knapsack	0.5 – 1.0 ml/m ²	20 – 30 ml/m ²		

Ingredient	Oxide Value	Elemental Value
Total Nitrogen (N)		0.00% N
Phosphorus Pentoxide (P ₂ O ₅)	33.10%	14.44% P
Phosphite (PO ₃)	37.00%	14.44% P
Potassium Oxide (K ₂ O)	20.30%	16.85% K
pH	3.0 – 5.0	
Nutrient analysis stated as w/v		

This product is not classified as hazardous for supply or for transport. Please refer to the associated safety data sheet for information and guidance on safe transport, handling, use and disposal of this product.

Formulated to compliment:
Maxwell Turf Hardener and Bullet Chelated Iron for non-pesticidal disease suppression.
