# SolControl

## Soluble Fertiliser

## 26-0-26+1%MgO+TE

| Total N | $NO_3$ | Urea | $K_2O$ | MgO | $SO_3$ | B | Cu EDTA | Fe EDTA | Mn EDTA | Mo | Zn EDTA | EC |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 25.71 | 7.6 | 18.1 | 26 | 1 | 2.127 | 0.015 | 0.017 | 0.06 | 0.034 | 0.0012 | 0.017 | 0.901 |

### Directions for Use

Maxwell SolControl should be added to a spray tank that has already been half filled with water and then agitated for 10 to 15 minutes and then the remaining water can be added. In periods of hot or dry weather applications that are undertaken at the high rate should be watered in with a couple of minutes of irrigation. Do not apply to drought-stressed turf.

### Application Rates

20 – 60kg per hectare. Maxwell SolControl soluble powder fertilisers are designed to be applied at an application rate of 10% concentration, at this concentration, and at 20 degrees Centigrade more than 99.9% will be soluble after 5 minutes of agitation in ambient, hard, tap-water. e.g. 20kg in 200 litres of water, 40kg in 400 litres of water, 60kg in 600 litres of water etc.

### Compatibility

Maxwell SolControl is compatible with all liquid and soluble products within the Maxwell Amenity product range. It is also compatible with the growth regulator Trinexapac-ethyl and can also be tank mixed with a broad range of phenoxy herbicides, contact your supplier for specific tank mixing recommendations.

### Precautions

In case of contact with eyes, rinse immediately with plenty of clean water (for at least 15 minutes) and seek medical advice. Wear appropriate personal protective equipment: gloves, coveralls and eye/face protection. In the case of an accident or if you feel unwell seek medical assistance immediately (show label if possible). Keep away from children.

KEEP IN ORIGINAL BAG IN A SAFE PLACE. PROTECT FROM FROST. DISPOSE OF BAG SAFELY.
