## GRANULES

High capacity superabsorbent polymer granules which increase plant water availability, reducing drought related stress and improving plant growth and health.

### Instructions For Use

#### Where To Use:

Aquastore Granules can be added to growing media, soils or composts to improve water holding capacity in many growing situations, including the following:

- Tree and shrub planting.
- All types of container planting.
- Borders and bedding plants.

#### When To Use:

Can be used all year round.

#### How To Use:

Aquastore Granules	Growing Media/Soil/Compost
1 g	1 L

1. Fully incorporate the dry Aquastore Granules into your chosen growing media, soil or compost at a rate of 1 g/L.
2. Irrigate the growing media soil or compost to capacity.
3. Allow to dry down for 1 - 2 hours then water again.
4. Use the wetted mix as desired.
