SLATE & STONE • GLASS • GRAVEL • PLASTIC & METAL SURFACES • TARMAC**

**MMC-PRO** – powerful anti-viral and anti-bacterial disinfectant for the easy treatment, removal and prevention of green mould and algae on all exterior hard surfaces. Also suitable for indoor use, and as a pre-paint fungicidal wash. This product is for professional use only.

**Application:** apply to **dry** surfaces only. Dilute 1:4 with water for normal use (or up to max 1:9 for light growths) and apply with low-pressure equipment. Saturate the surface and leave to dry. Do not apply if rain is expected in the next 5-6 hours. Will cover an area of about 3.5 sq.m (horizontal surfaces) to 7 sq.m (vertical surfaces) per litre of diluted product.

**Reaction time:** kills green mould and algae within days, and cleans the exposed surfaces

in the weeks and months to come. Any residual dead growth can be lightly brushed away. Some concrete and hard surfaces may turn rusty brown in patches; this is a normal reaction and discolouration will soon dissipate. Also kills black mould, but residual black mould staining may persist.

In the event of direct contact with plants, flush with clean water. **Keep animals off treated surfaces until completely dry (often 5-6 hours).** For further information please visit [www.brintonproducts.co.uk](http://www.brintonproducts.co.uk).
