

Microbial Water Cleaner and Deodoriser

Removes Algae and Blanket Weed from Ponds and Lakes

- ✓ Prevents blanket weed and algal blooms
- ✓ Helps to prevent green and cloudy water
- ✓ Reduces organic silt build-up
- ✓ Eliminates odour problems
- ✓ Non-chemical, safe for fish farms and irrigation ponds

Maxwell AlgaPHite Action:

Maxwell AlgaPHite is a natural formulation of bacteria, enzymes, buffers and dispersing agents. These help to prevent algae blooms by removing nitrates and phosphates from the water which are the primary food source of the algae.

25 x 200 g
water soluble sachets

Application and Dosage:

Simply throw the required number of sachets into the water so they are dispersed equally around the body of water. Apply on a weekly basis throughout the spring, summer and autumn when water temperature exceeds 10 °C.

Initial dose: use two 200 g sachets per 800 m³ (800,000 L) of water. Followed by one sachet per week.

Additional Information

Maxwell AlgaPHite will control existing algae problems by removing the food source. It may take up to 6–9 weeks to remove nitrogen stored in severe algae blooms. **Do not** apply if the water temperature is below 10 °C. A water pH higher than 8.5 and high levels of iron or manganese in the water will inhibit the action of Maxwell AlgaPHite.

IMPORTANT: To give ample opportunity for the bacteria to successfully colonise a body of water it is important that a volume of water subject to a flow retains a minimum volume of the original water over a specific period of time, as per the following table.

Size of Water Body with Flow	Required Water Retention
Less than 1,000 m ³	50% retention of water over a 2 week period
Greater than 1,000 m ³	80% retention of water over a 4 week period

Contains

Natural bacteria and fungi, buffers and natural dispersing agents. Includes 4 primary strains of non-pathogenic bacteria at a concentration of 5 billion colony-forming units (CFU's) per gram.

Precaution

Store locked away. Avoid breathing dust. In case of inadequate ventilation, wear respiratory protection.

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms call a doctor/physician. Dispose of contents/container in accordance with local regulations.
