

SPPS 80/120

Techneat's SPPS 80 and SPPS 120 are aimed at the professional, for use on fine turf areas

This unique self-propelled sprayer offers operators improved spray control, versatility and comfort. The clean design using the very best components ensures a long product life coupled with low maintenance. The SPPS models are available in two tank sizes 80 and 120 litres. Techneat's sprayers are built to the highest specifications with a host of features.

The SPPS 80/120 are truly compact light weight amenity sprayers, designed and developed in close conjunction with many of the UK's top ground care specialists. The SPPS models aim to meet the demands of fine turf chemical application, providing the user with the ability to apply reliably and accurately all year round.
