

# DATA SHEET

## TRULEVEL model ref. HRT bowling green roller

The SISIS TRULEVEL is an all-steel triple roller for bowling greens and similar areas. As the weight of approx. 102kg is spread over three rollers the soil is firmed without compaction. Because of the relatively small diameter, the rolling factor (pressure on the turf) is equal to that produced by a heavier roller.

### SPECIFICATION: TRULEVEL

Overall width	107cm	42ins
Working width	91cm	36ins
Length	70cm	27 <sup>1</sup> / <sub>2</sub> ins
Height	130cm	51ins
Weight	102kg	224lbs

### FEATURES

Over-riding action on slight hollows allows level areas to be firmly rolled, whilst low areas are left, so that the playing surface is progressively levelled.

Outer rollers can be raised concentrating the whole weight on the centre cylinder if desired.

Additional weights can be added if required, to increase weight to approx. 150kg (328lbs)

Runs without effort on self-lubricating bearings.

Can be pushed or pulled with ease.

### TRULEVEL OPERATING PRINCIPLE

# sisis®
